Anthony Bourdain: The Last Interview Sep 22 2021 The New York Times Bestseller The brilliant intellect and candor of Anthony Bourdain is on full display in this collection of interviews from throughout his remarkable career, with an introduction from The New Yorker's Helen Rosner. Anthony Bourdain always downplayed his skills as a chef (many disagreed). But despite his modesty, one thing even he agreed with was that he was a born raconteur—as he makes clear in this collection of sparkling conversations. His wit, passion, and deep intelligence shine through all manner of discussion here, from heart-to-hearts with bloggers, to on-stage talks before massive crowds, to intense interviews with major television programs. Without fail, Bourdain is always blisteringly honest—such as when he talks about his battles with addiction, or when detailing his thoughts on restaurant critics. He regularly dispenses arresting insight about how what's on your plate reveals much of history and politics. And perhaps best of all, the heartfelt empathy he developed travelling the world for his TV shows is always in the fore, as these talks make the “Hemingway of gastronomy,” as chef Marco Pierre White called him, live again.

Creativity and "the Paris Review" Interviews Jun 07 2020 Creativity and The Paris Review Interviews: A Discourse Analysis of Famous Writers' Composing Practices centers around a thematic discourse analysis of a 2000-page corpus of Paris Review interviews, focusing on the creative processes of some of the world's most famous fiction-writers and poets. The discourse analysis traces elements of the paradigmatic creative-process model—first insight, preparation, incubation, insight, verification—through the focal artists' descriptions of their composing practices as embedded in the interview transcripts.

That analysis also reveals multiple and significant emergent themes germane to fiction and poetry writing. The ultimate goal of this analysis is to identify patterns relevant to the aforementioned creative-process elements and themes that are suggestive of specific strategies writers can employ to facilitate their own composing acts—whether fictional, poetic, or expository. Such findings will also benefit teachers seeking to facilitate student success in the composition classroom. Such applications to expository writing are bolstered by a thorough treatment of scholarship on intersections between creativity theory and composition theory.
